ONSITE

HERON REACH / 32-PLAYER MASTERPLAN

16v16 design target · 144 × 120 m estate · five heights · no networking expansion

32 PLAYERS · DESIGN 01

00

A LONDON ESTATE, NOT AN ARENA BOX

Wet stock brick, warm entrances, planted edges and linked concrete galleries. Three places to recognise; multiple paths between them.

LAYERED PLAY

-3 m undercroft / 0 m street / +3 m galleries / +6 m maisonettes / +9 m two roofs. Eight stair cores and sixteen enterable homes.

SNEAK WITHOUT GETTING LOST

Through flats, private stairs, covered arcades and a service loop reconnect to familiar landmarks. No compulsory crawl tunnels or dead-end routes.

BUILDABLE NEXT STEP

One metric definition drives every sheet and the separate Blender massing model. This is a proposal for blockout and 32-player testing, not proof of balance.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

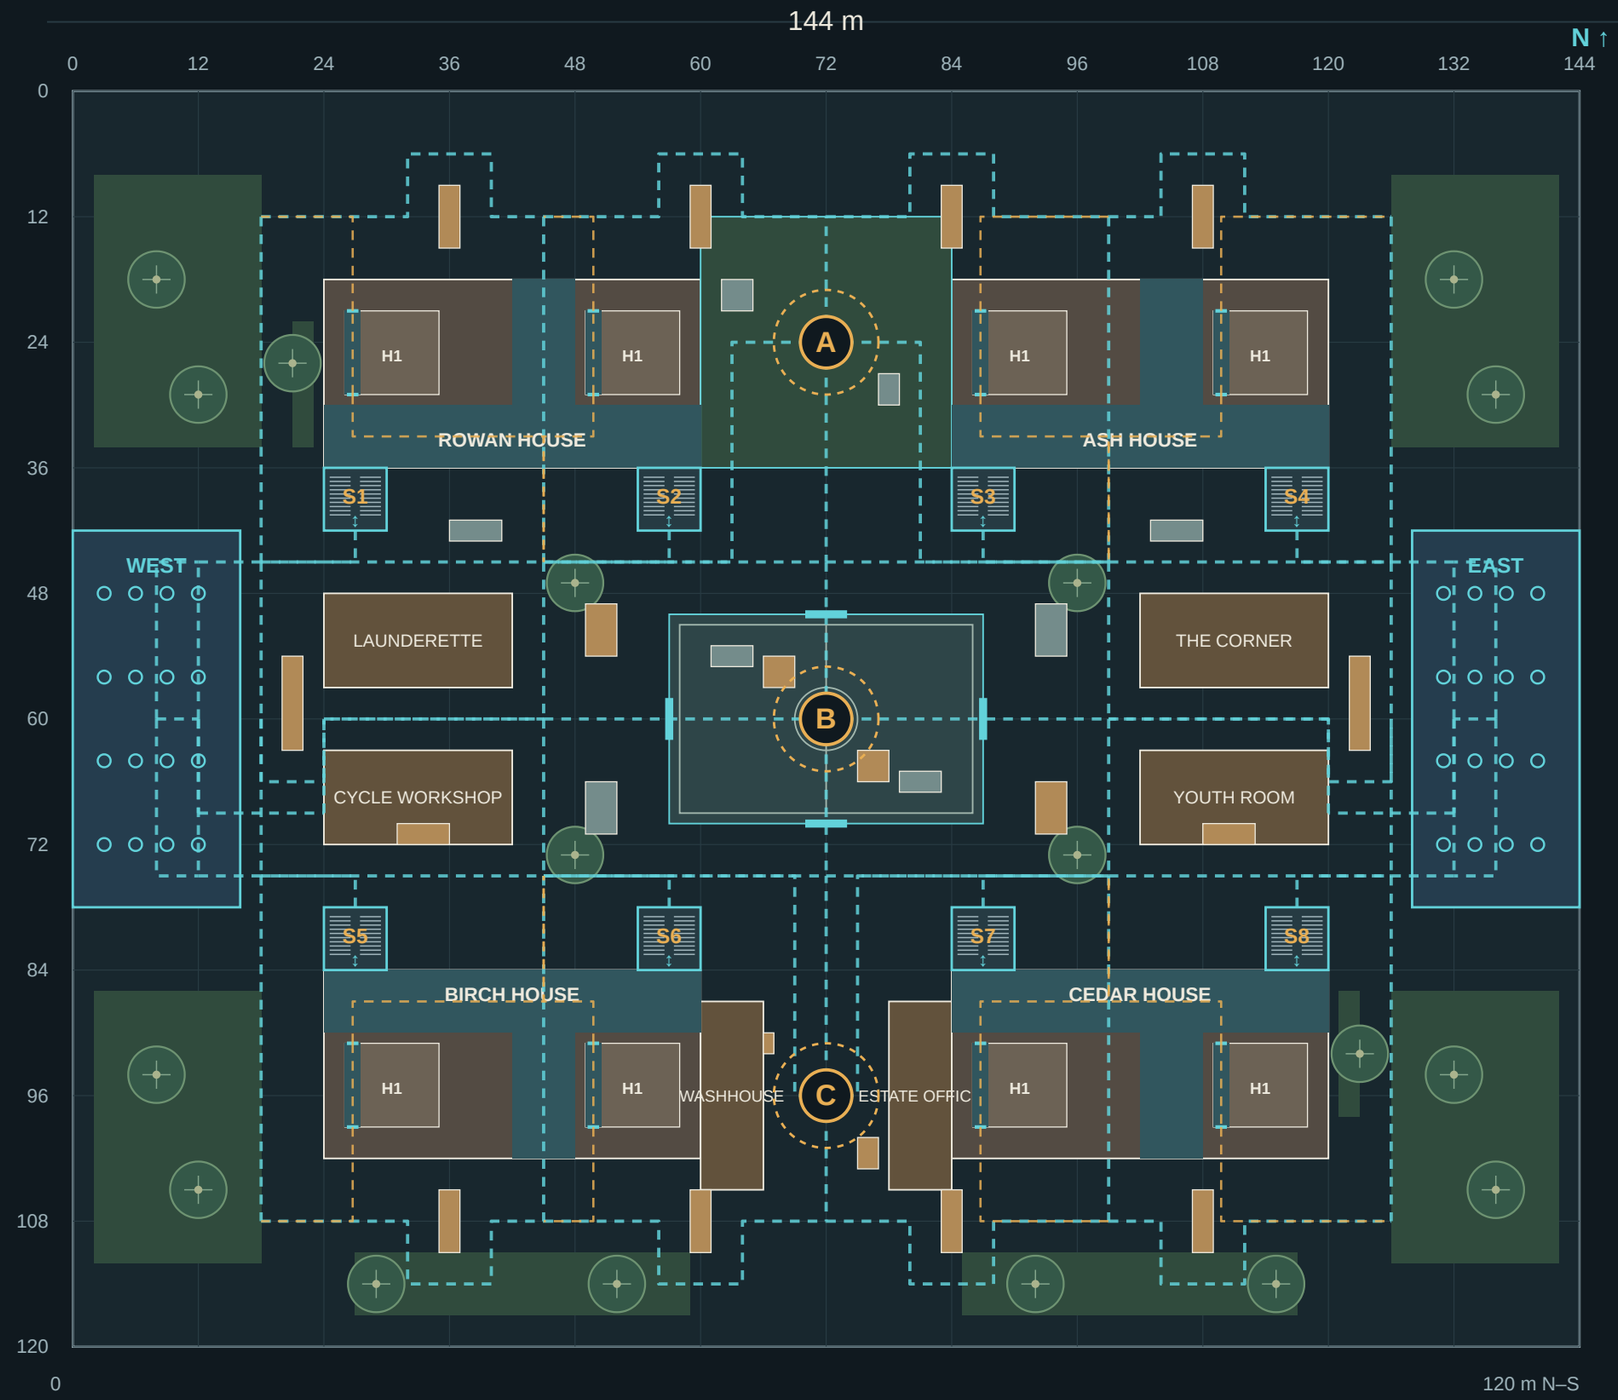

ONSITE

HERON REACH / GROUND + GARDENS

+0.00 m · Three contested spaces, homes, shops and protected starts.

32 PLAYERS · DESIGN 01

01

THREE DIFFERENT FIGHTS

A / Garden Court: planting and low walls. B / The Cage: exposed multi-use court. C / Washhouse Square: close shopfront and service routes.

WAYS AROUND

Public arcades cut through four blocks. Eight ground flats have two exits. Corner shop, cycle workshop and youth room sit around covered passages.

32 INITIAL POSITIONS

16 west + 16 east, each with three exits and offset screens. Dynamic respawn safety still needs runtime implementation and visibility testing.

READABLE DEPTH

Primary routes 4 m; public doors 1.5 m. Private halls 1.5 m and doors 1.1 m make homes slower, smaller-team choices.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

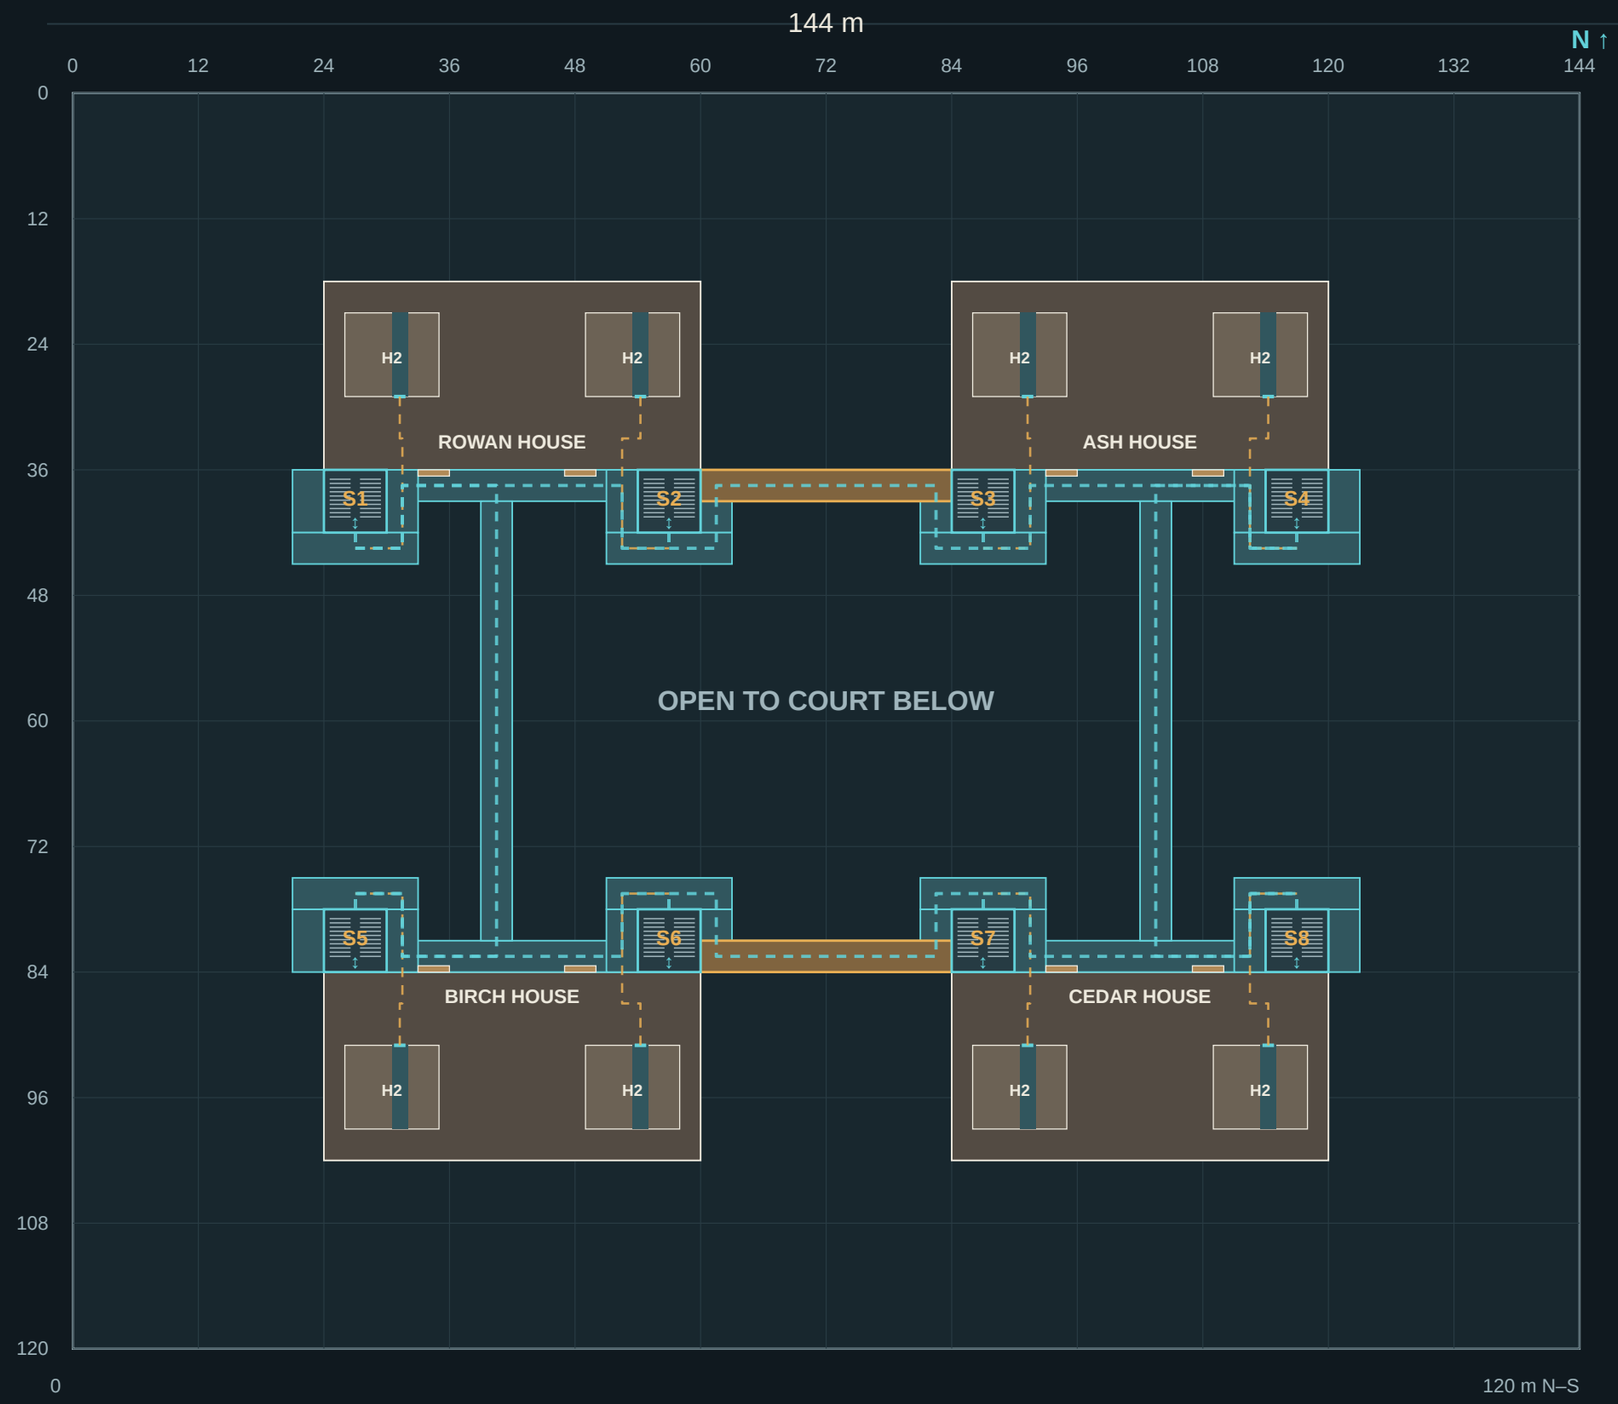

ONSITE

HERON REACH / GALLERIES + MAISONETTES

+3.00 m · Continuous gallery loop; two exposed bridge crossings.

32 PLAYERS · DESIGN 01

02

ONE CONNECTED LOOP

3 m wide galleries link all eight public cores. North and south bridges cross the 24 m gaps between blocks.

HOMES AS ALTERNATIVES

Eight maisonettes enter here. Private stairs rise to +6 m and leave through rear landings, avoiding the public gallery choke.

HEIGHT HAS A COST

Exposed bridge crossings and warm stair exits reveal movement. Privacy screens limit cross-court views; every strong position has another approach.

NO INVISIBLE FLOORS

The centre is open to the court below. Only coloured surfaces and stair landings have a proposed walking floor.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

ONSITE

HERON REACH / UPPER HOMES

+6.00 m · Four separate residential islands; no floating cross-court floor.

32 PLAYERS · DESIGN 01

03

FOUR RESIDENTIAL ISLANDS

Upper maisonettes and rear landings at +6 m. There is no upper bridge or continuous floor over the central void.

TWO PUBLIC EXITS EACH

Each block connects to two public cores. Eight private maisonette stairs give additional routes down to the +3 m gallery.

LIMITED OVERLOOKS

Selected windows and screened landings cover short sectors. Rear walls facing spawns remain opaque. Roof access is only in Rowan and Cedar.

GROUND OUTLINE IS CONTEXT

Hatched/grey areas show buildings below. They are not walking routes at this height.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

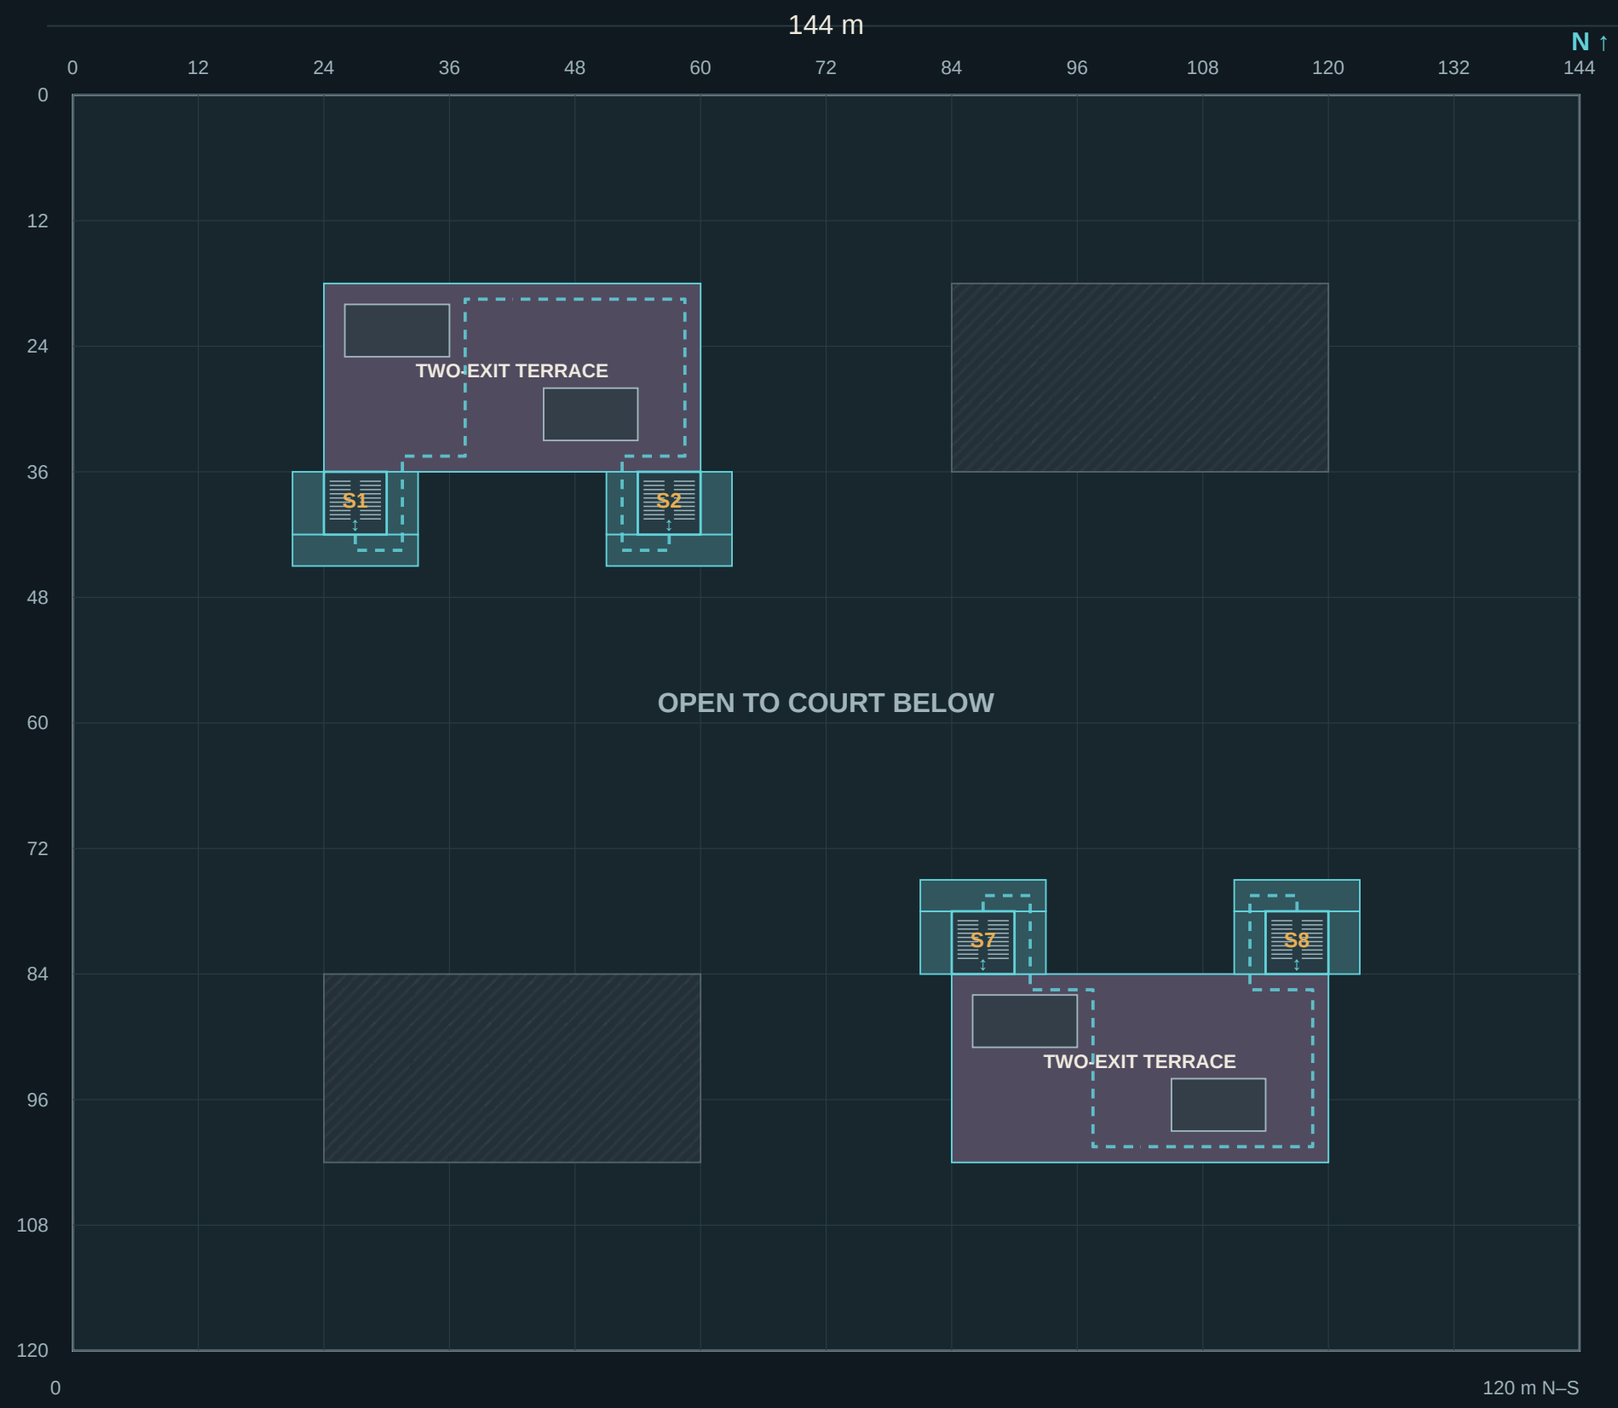

ONSITE

HERON REACH / LIMITED ROOF ROUTES

+9.00 m · North-west and south-east only; two stair exits per terrace.

32 PLAYERS · DESIGN 01

04

TWO SMALL ROOF AREAS

Only Rowan House (north-west) and Cedar House (south-east) are accessible at +9 m. Two stair exits on each; no ladders or mandatory jumps.

NO MAP-WIDE SNIPER PERCH

Plant rooms and 2.1 m screens break roof views. Selected court-facing bays only; opaque parapet screens face the spawn areas.

FAIR COUNTER-ROUTES

Roof access costs extra travel. Both stair exits stay contestable. No rooftop capture objective, so the main fight remains downstairs.

OTHER ROOFS ARE CLOSED

No traversable roof over Ash or Birch. Do not turn background towers into reachable sniper positions during art dressing.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

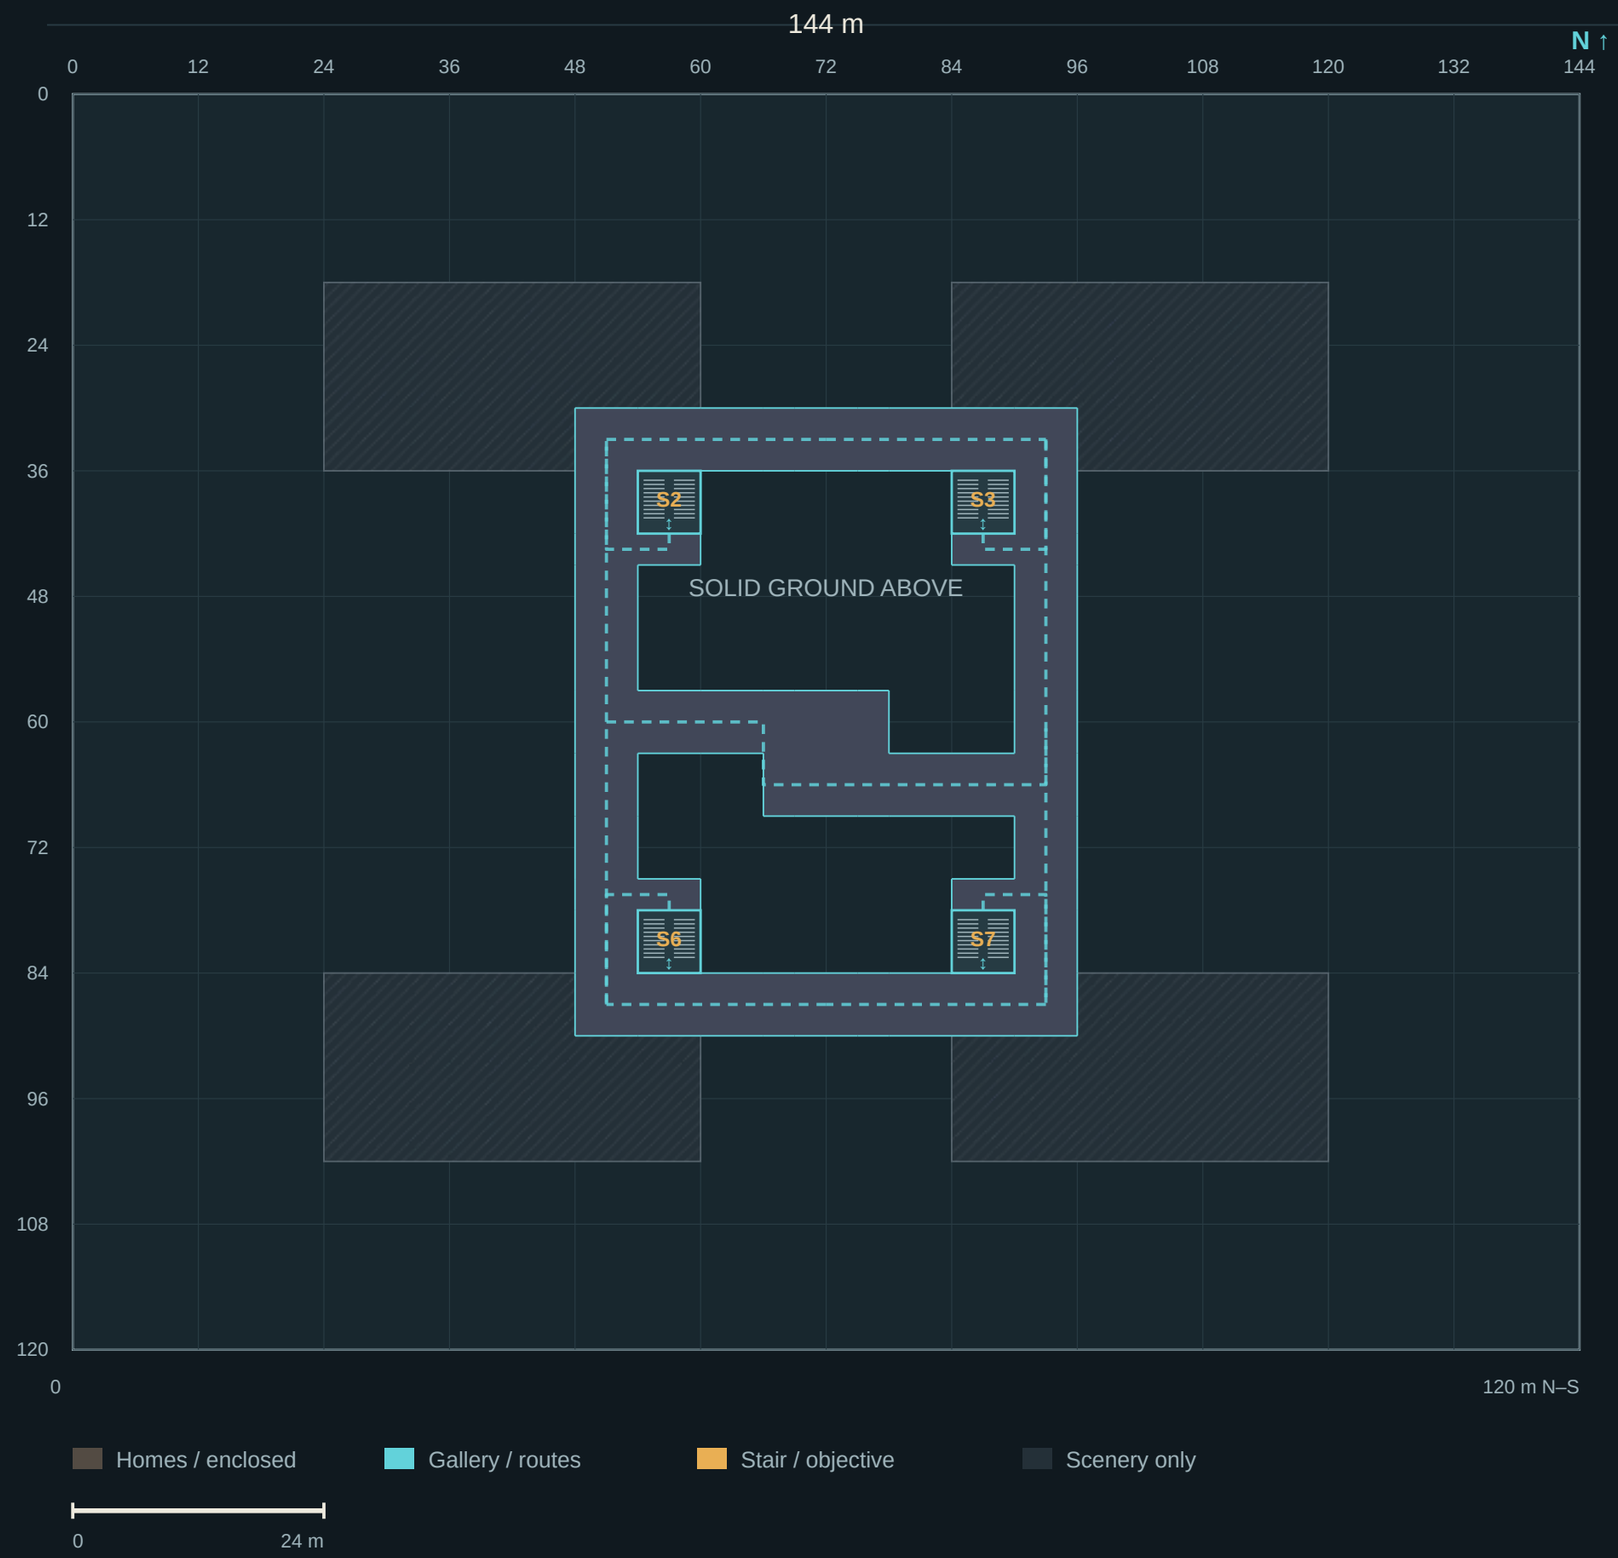

ONSITE

HERON REACH / UNDERCROFT

-3.00 m · Partial service loop; four exits, no spawn rooms.

32 PLAYERS · DESIGN 01

05

PARTIAL UNDERCROFT

A service loop under the central blocks and court. Four stairs connect it to ground and the gallery system: S2, S3, S6, S7.

SLOWER, HIDDEN CHOICE

A dogleg middle cross-link adds options. No dead-end spawn room or one-way drop. Warm exit markers contrast with cool service lighting.

SOUND IS THE TRADEOFF

Grilles, concrete and metal doors give clear footsteps. Stealth comes from broken sightlines and timing, not blacked-out character visibility.

DESIGN GRAPH ONLY

The linework proves planned connections. Headroom, support columns, wall offsets and actual Rapier traversal must be validated in the blockout.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

ONSITE

HERON REACH / HOME DESIGNS

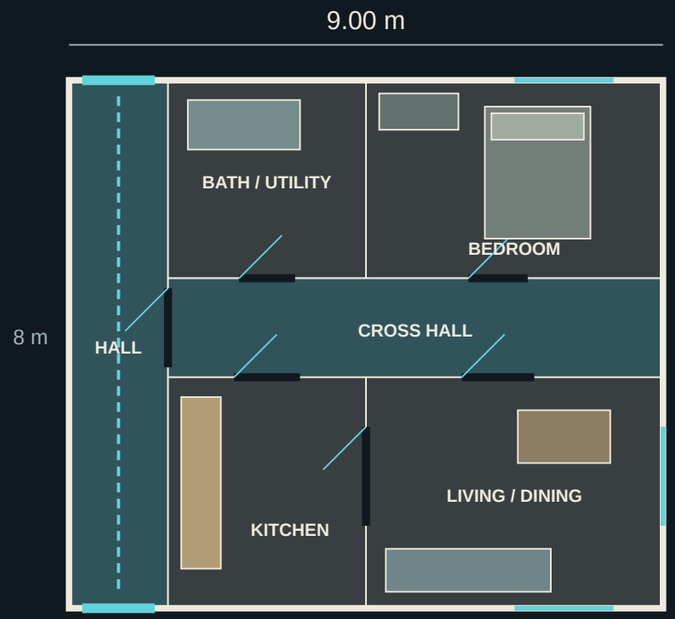

32 PLAYERS · DESIGN 01

06

H1: eight through flats · H2: eight two-storey maisonettes · 9 × 8 m gross footprint each

H1 / THROUGH FLAT

GROUND ±0.00 m

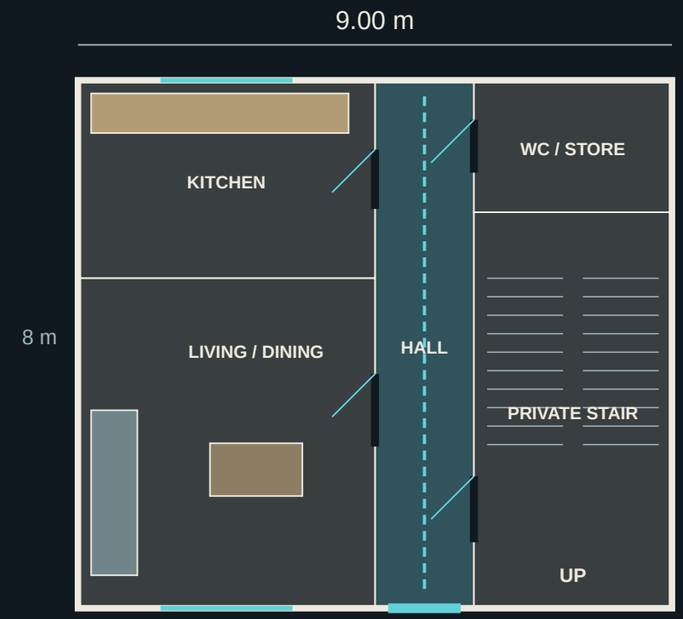

Two public-facing exits via a 1.5 m hall. Bedroom and bath are optional rooms, not compulsory through-routes.

72 m² gross / one bedroom

H2 / LOWER FLOOR

GALLERY +3.00 m

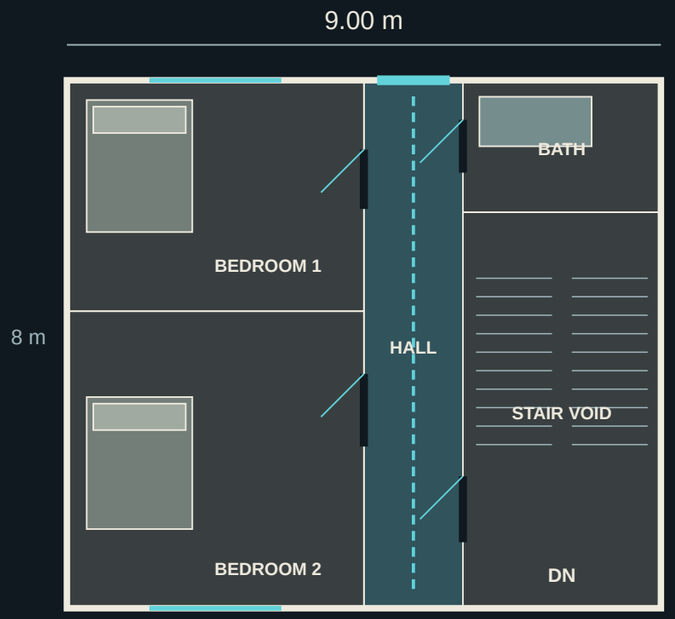

Lower gallery entry and upper rear landing exit. Private stairs form a slower alternative to public cores.

72 m² gross per storey / 144 m² total

H2 / UPPER FLOOR

REAR LANDING +6.00 m

Two bedrooms, bathroom and a separate hall. Exit to the rear landing; bedrooms never need to become the public circulation route.

72 m² gross per storey / 144 m² total

ROOMS THAT CAN BE LIVED IN — AND READ IN PLAY

Kitchen, bath, storage, bed and living space are dimensioned. Keep halls clear: 1.5 m; home doors 1.1 m. Public doors are 1.5 m. Furniture footprints are planning allowances, not final props.

Private stair: 1.2 m flights · 20 × 0.15 m risers · 0.28 m going · 1.2 m landings. Test headroom and carry the opening through both floors.

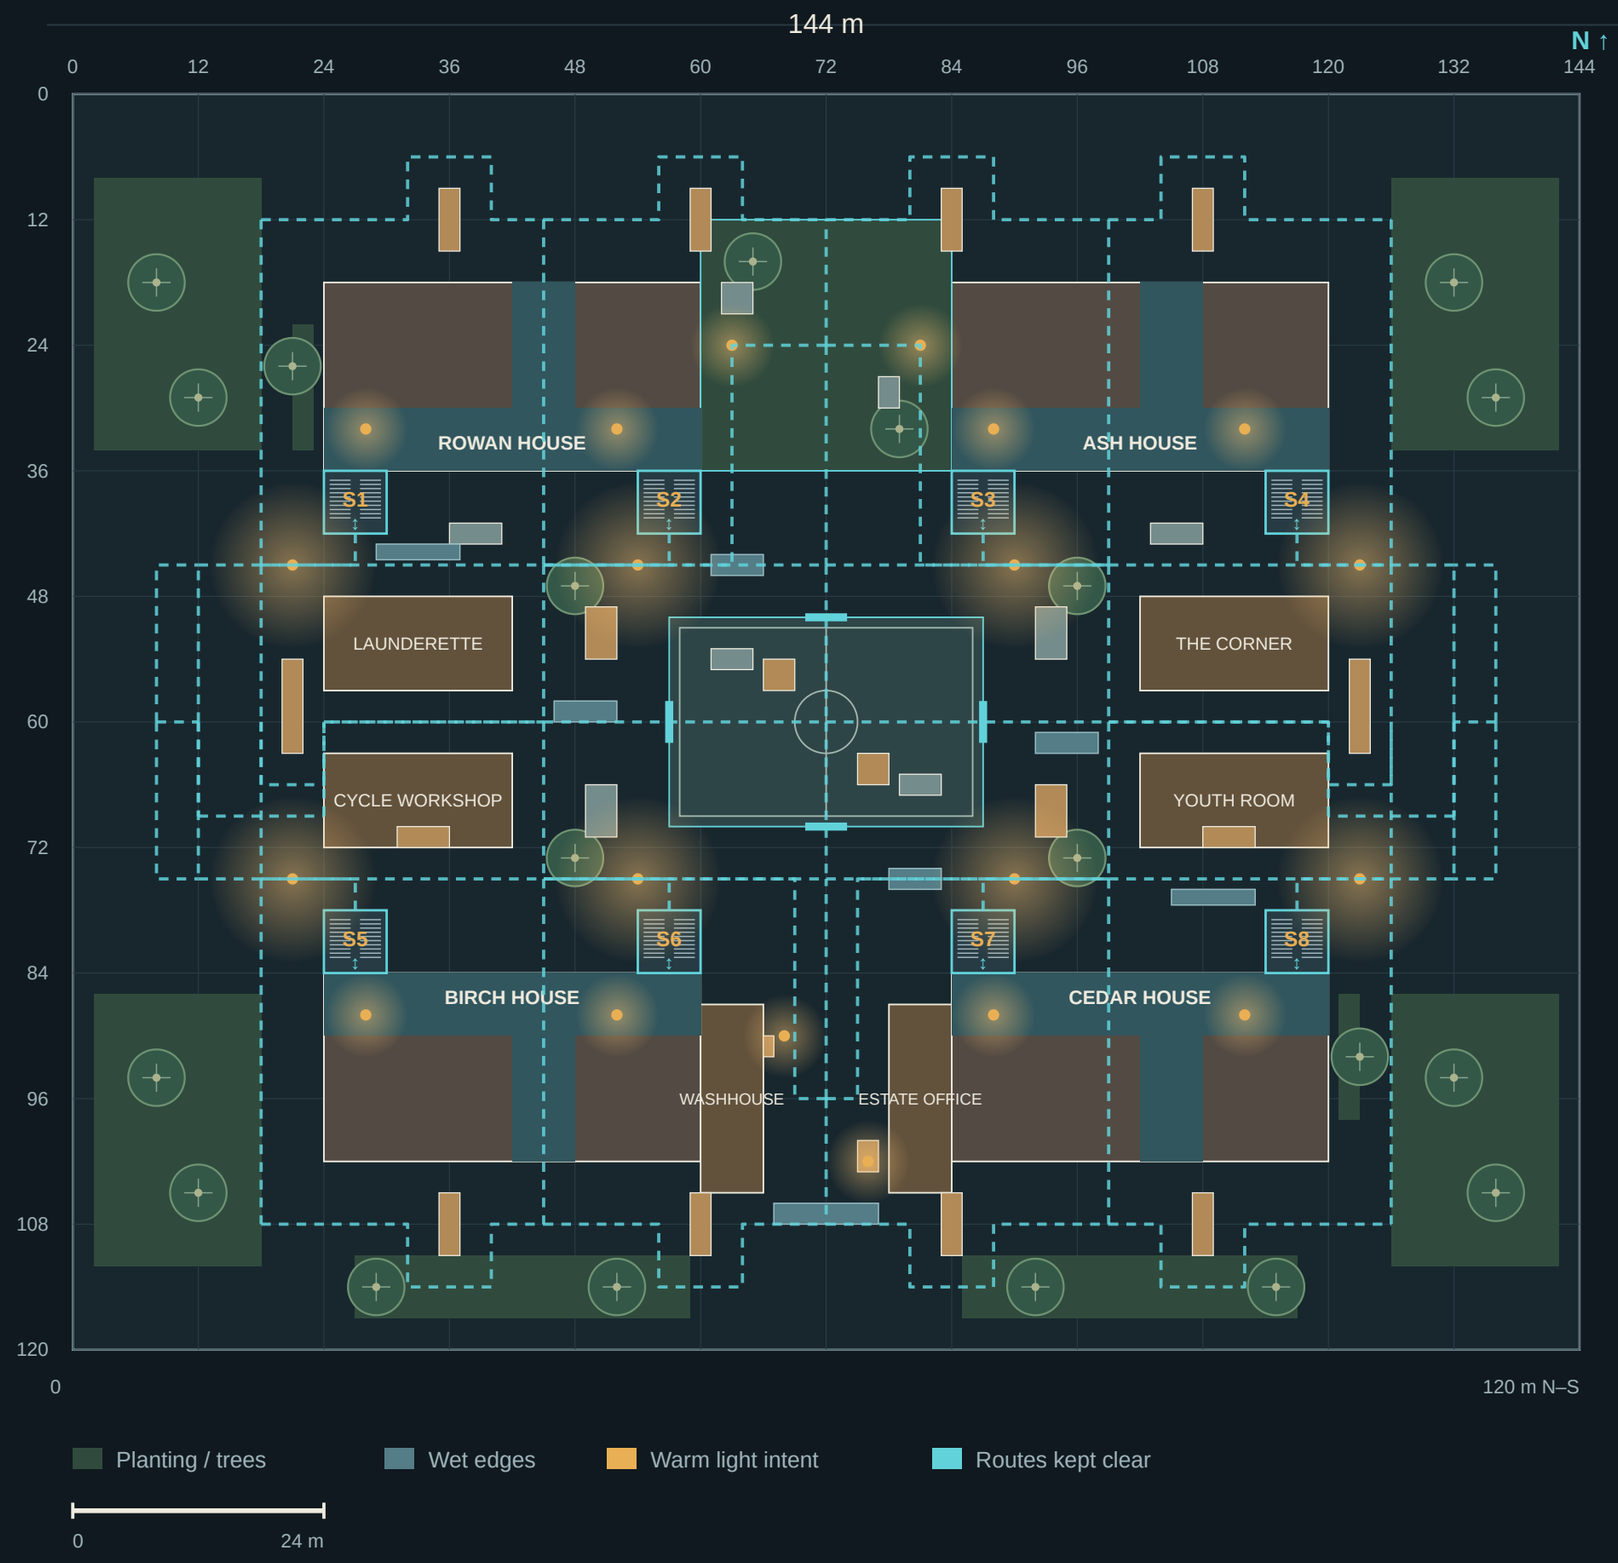

ONSITE

HERON REACH / LANDSCAPE + LIGHTING

A coordinated dressing layer · blue-hour sky / warm entrances / rain-darkened materials

32 PLAYERS · DESIGN 01

07

COOL AIR / WARM THRESHOLDS

Blue-hour ambient light with 2700 K doors and shopfronts, 3000 K court lights. Stair faces stay readable. Light circles show intent, not measured lux or runtime light counts.

PLANTING HAS STRUCTURE

20 tree positions: trunks collide, canopies start at 2.7 m. Ten grass/soil zones; shrubs below 0.7 m by main routes. Leaves provide visual texture, not dependable ballistic cover.

DIRT BELONGS SOMEWHERE

Litter at shopfronts and bin bays; moss at shaded slab joints; soil under planting; puddles at drains and low edges. Keep steps, doorway swings and cover gaps clear.

SIX BASE MATERIAL FAMILIES

Stock brick, board concrete, asphalt, paving, painted steel and soil/grass. Share PBR sets; use local grime/wetness masks, instancing and LODs.

PROPOSED DESIGN · METRE SCALE · NOT YET COLLISION-TESTED OR PLAYTESTED

ONSITE

HERON REACH / LEVELS + SECTIONS

32 PLAYERS · DESIGN 01

08

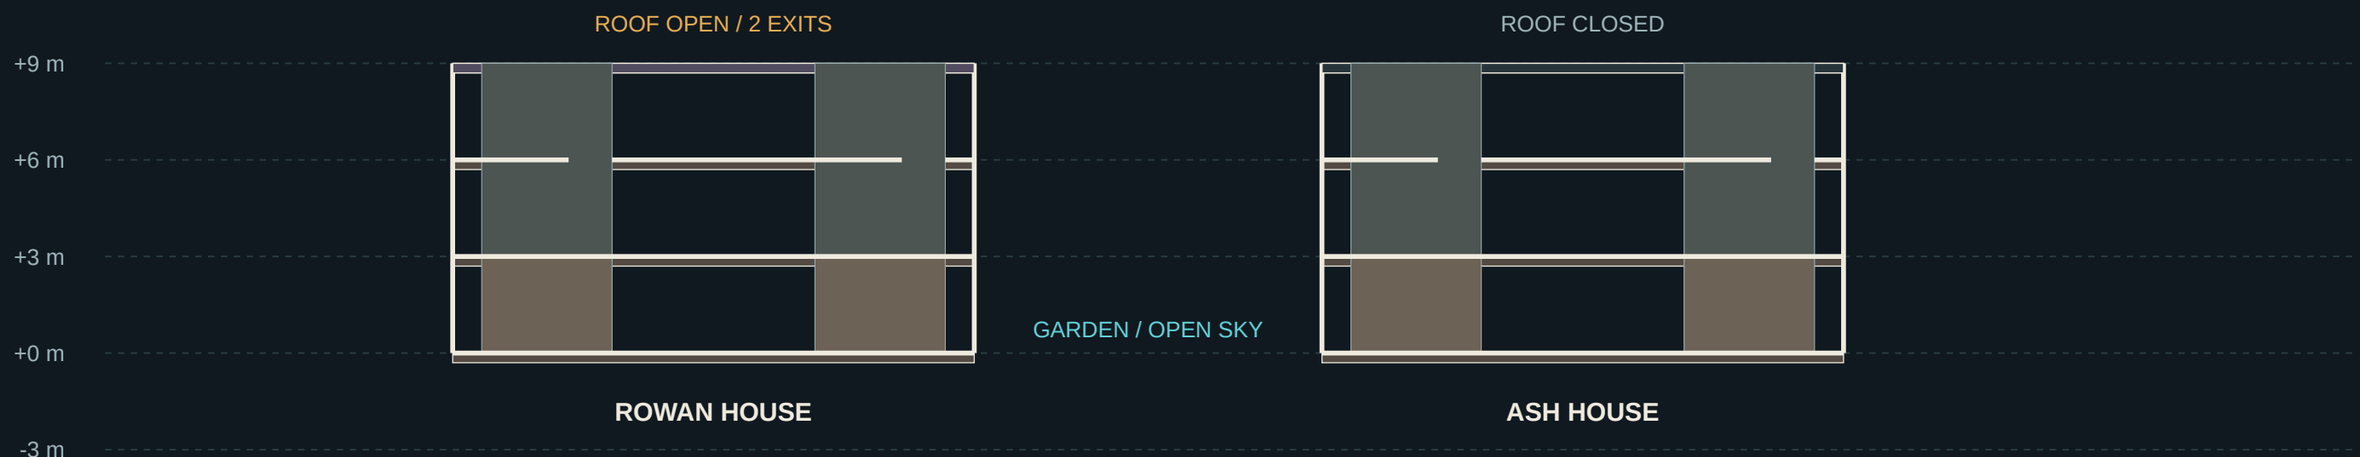

Sections through the metric design · height is exaggerated for readability; dimensions remain explicit

A—A / NORTH–SOUTH AT x = 72 m

PARTIAL SERVICE ROUTES AT −3 m

B—B / EAST–WEST AT z = 24 m

Public cores: 6 × 6 m · 1.5 m flights and landings · 20 risers per 3 m storey · 0.15 m rise / 0.28 m going. Target clear headroom 2.4 m; slab and stair openings must be tested in the runtime blockout.
